Pak, Michael sequence search approval--08/170344

Michael,

08/170344

This case has been ABN since 01/97; however Applicants petitioned to have it revived and of course it was revived. There are 74 short peptide sequences in the claims that it appears I have examined in the past. However, I don't see any sequence search results in the eDAN file. I need a commercial and interference search done. Please approve so I can get this case moved.

STIC

Please do commercial and interference sequence search on SEQ ID NO: 1-75 (all aa sequences) of this application.

Please provide a paper copy of all results.

Thanks, Minnifield, 71976 Art Unit 1645 Office REM-3C01 Mailbox REM-3C18 571-272-0860

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 3,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               GENERAL INFORMATION

GENERAL INFORMATION

GENERAL INFORMATION

APPLICANT: COMMISSARIAT A L'ENERGIE ATOMIQUE

APPLICANT: ONGRITH NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDICALE

APPLICANT: MAILLERE, Bernard

APPLICANT: BOUNGAULLE-MORATILLE

APPLICANT: BOUNGAULLE-MORATILLE

APPLICANT: GUILLET, Jean-Gerard

TITLE OF INVENTION: Mixture of peptides derived from E6 and/or E7

TITLE OF INVENTION: Mixture of peptides derived from E6 and/or E7

TITLE OF INVENTION: Mixture of peptides derived

FILE REFERENCE: 45636-571-US

CURRENT APPLICATION NUMBER: US/10/476,570

CURRENT PILING DATE: 2003-11-04

PRIOR PILING DATE: 2003-11-04

PRIOR FILING DATE: 2001-05-04

NUMBER OF SEQ ID NOS: 63

SOFTWARE: PALENTIN VET. 2.1

SEQ ID NO 9

LENGTH: 32
                                                                                                                                                                                                                                                                                                                                                                                                              APPLICANT: COMMISSARIAT A L'ENERGIE ATOMIQUE

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 6, Application US/1017390
Sequence 6, Application US/1017390
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Schuler, Gerold
APPLICANT: Schuler, Gerold
TITLE OF INVENTION: Improved Transfection of Eucaryotic Cells with Linear
TITLE OF INVENTION: Polymucleotides by Electroporation
TITLE REFERENCE: 021505w0/JH/ml
CURRENT APPLICATION NUMBER: US/10/177,390
CURRENT FILING DATE: 2002-06-20
NUMBER OF SEQ ID NOS: 34
SOFTWARE: Patentin Ver. 2.1
SEQ ID NO 6

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Description

C;Species: Bombyx mori nuclear polyhedrosis virus, BmSNPV
A;Variety: isolate T3
C;Date: 03-Dec-1999 #sequence_revision 03-Dec-1999 #text_change 09-Jul-2004
C;Accession: T41855
R;Gomi, S.; Majima, K.; Maeda, S.
J. Gen. Virol. 80, 1323-1337, 1999
A;Title: Sequence analysis of the genome of Bombyx mori nucleopolyhedrovirus.

STRAINscv. Black Mexican Sweet;
Canaday J., Stoppin V., Endle M.C., Lambert A.M.;
Submitted (APR-1994) to the EMBL/GenBank/DDBJ databases.
-- FUNCTION: Tubulin is the major constituent of microtubules. Gamma tubulin is found at microtubule organizing centers (MTOC) such as the spindle poles or the centrosome, suggesting that it is involved in the minus-end nucleation of microtubule assembly.
-- SIMILARITY: Belongs to the tubulin family.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        "Nucleotide sequence of a cDNA (OstubG2) encoding a gamma-tubulin in the rice plant (Oryza sativa).";

(er) Plant Gene Register PGR99-186

-!- PUNCTION: Tubulin is the major constituent of microtubules. Gamma tubulin is found at microtubule organizing centers (MTOC) such the spindle poles or the centrosome, suggesting that it is involved in the minus-end nucleation of microtubule assembly.
-!- SIMILARITY: Belongs to the tubulin family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         16-OCT-2001 (Rel. 40, Created)

-! FUNCTION: Tubulin is the major constituent of microtubules. Gamma-tubulin is found at microtubule organizing centers (WTOC) such as the spindle poles or the centrosome, suggesting that it is involved in the minus-end nucleation of microtubule assembly.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Eukaryota, Viridiplantae, Streptophyta, Embryophyta, Tracheophyta,

                                                                                                                                                                                                                                          Nature 408:820-822(2000).

-!- FUNCTION: Tubulin is the major constituent of microtubules. Gamma tubulin is found at microtubule organizing centers (MTOC) such as the spindle poles or the centrosome, suggesting that it is involved in the minus-end nucleation of microtubule assembly.
-!- SIMILARITY: Belongs to the tubulin family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 57, Application US/0958588

Patent No. 6493161

GENERAL INFORMATION:
APPLICANT: Gudmundur Hjorleifsdotter
APPLICANT: Gudmundur O. Hreggvidsson
APPLICANT: Gudmundur O. Hreggvidsson
APPLICANT: Jakob K. Kristjansson
APPLICANT: Jakob K. Kristjansson
APPLICANT: Jakob K. Kristjansson
TITLE OF INVENTION: Bacteriophage RM378 of a Thermophilic
TITLE OF INVENTION: Host Organism
FILE REFERENCE: 2739.1001-001
CURRENT APPLICATION NUMBER: US/09/585,858
CURRENT APPLICATION NUMBER: 05/0137,120

PRIOR FILING DATE: 1999-06-02
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ; OTHER INFORMATION: Standard peptide that binds to HLA A*2401
